PALAEOGRAPSUS PARVUS (CRUSTACEA, DECAPODA),
A REPLACEMENT NAME FOR PALAEOGRAPSUS BITTNERI
MÜLLER & COLLINS, 1991, NON PALAEOGRAPSUS BITTNERI
MORRIS & COLLINS, 1991

P. MÜLLER & J.S.H. COLLINS

In the recently published Late Eocene coral-associated decapods (Crustacea) from Hungary (Müller & Collins, 1991) we published a new species Palaeograpsus bittneri; we are now aware that this name is preoccupied by Palaeograpsus bittneri Morris & Collins, 1991 from the Pliocene of Brunei.

To replace the homonym we propose Palaeograpsus parvus nom. nov. for the Hungarian species.
